| Part No.                                                   | Description                                                     |
|------------------------------------------------------------|-----------------------------------------------------------------|
| <b>FL-816 Series Conventional Fire Alarm Control Panel</b> |                                                                 |
| FL-816/650PS5                                              | FL- 816 zones fitted with NPS-5 in CAB650, 5.6A PSU             |
| FL-816/650PS11                                             | FL- 816 - 8 zones fitted with NPS-11 in CAB650, 11.7A PSU       |
| FL-816/900PS11                                             | FL - 816 - 8 zones fitted with NPS-11 in CAB900, 11.7A PSU      |
| FL-816/650PS11GL                                           | FL816-8Z,PS-11,CAB650,11.7A Gas Rel                             |
| FL-816/900PS11GL                                           | FL - 816 - 8 zones fitted with NPS-11 in CAB900, 11.7A PSU      |
| <b>FL-816 Accessories</b>                                  |                                                                 |
| ZEM-8                                                      | 8 Conventional Zone Expansion Module                            |
| ACM-8RA                                                    | 8 Way relay module                                              |
| ZLKT16                                                     | Zone label kit, 1-16 zones for customer labelling               |
| ACM-ZM8                                                    | 8 Zone Mimic Annunciator, controller, zones 1-8                 |
| AEM-ZM8                                                    | 8 Zone Mimic Annunciator, expander, zones 9-16                  |
| ARE                                                        | ARE Interface Board Assembly to suit custom jobs                |
| ARE-T                                                      | ARE interface to suit Centaur                                   |
| ARE-CR                                                     | ARE interface to suit Code Red, Romteck (shallow)               |
| ARE-R                                                      | ARE interface to suit Romteck & Centaur II                      |
| <b>FireLite SMX+ Intelligent Fire Alarm Control Panel</b>  |                                                                 |
| SMX+650-1L-PS5                                             | SMX+ in CAB650 with 1xSLC, NPS-5                                |
| SMX+650-1L-PS11                                            | SMX+ in CAB650 with 1xSLC, NPS-11                               |
| SMX+900-1L-PS5                                             | SMX+ in CAB900 with 1xSLC, NPS-5                                |
| SMX+900-1L-PS11                                            | SMX+ in CAB900 with 1xSLC, NPS-11                               |
| SMX+650-1L-PS11GL                                          | SMX+CAB650 1xSLC,NPS-11 - Gas Rel                               |
| SMX+28U1LPS11                                              | SMX+ in 28U with 1xSLC, NPS-11                                  |
| SMX+40U1LPS11                                              | SMX+ in 40U with 1xSLC, NPS-11                                  |
| LCM-320                                                    | Loop Control Module                                             |
| LEM-320                                                    | Loop Expander Module                                            |
| <b>SMX+ Annunciators</b>                                   |                                                                 |
| LCD2-80-AUS                                                | LCD Annunciator (80 Character), to suit AFP-3030/NCA-2          |
| SCS-8A                                                     | Smoke Control Annunciator (Control) 8 x switch groups           |
| SCE-8A                                                     | Smoke Control Annunciator (Expander) 8 x switch groups          |
| SCS-8L                                                     | Smoke Control Lamp Driver Kit 8 x switch groups                 |
| SCE-8L                                                     | Smoke Control Lamp Driver (Expander) to suit AFP-3030           |
| ACM-24AT-AUS                                               | Annunciator Control 24 buttons, 48 LEDs                         |
| AEM-24AT-AUS                                               | Annunciator Expander 24 buttons, 48 LEDs                        |
| ACM-48A-AUS                                                | Annunciator Control, 48 LEDs, to suit AFP-3030/NCA-2            |
| AEM-48A-AUS                                                | Annunciator Expander, 48 LEDs, to suit AFP-3030/NCA-2           |
| LDM-32-AUS                                                 | Lamp Driver Module (Control), 32 LEDs or LDM-R32                |
| LDM-E32-AUS                                                | Lamp Driver Module (Expander), 32 LEDs or LDM-R32               |
| LDM-R32-AUS                                                | Lamp Driver Relay Kit, 32 Relay board, requires LDM-32          |
| SMX+NCA-2                                                  | SMX+ Network Control Annunciator, requires DISP-SMX+            |
| <b>FIRELITE-NET Networking modules</b>                     |                                                                 |
| NCM-W                                                      | Network Control Module, Wire, to suit Noti-Fire-Net             |
| NCM-F                                                      | Network Control Module, Multi-mode Fibre, to suit Noti-Fire-Net |

| Part No.                                   | Description                                                                   |
|--------------------------------------------|-------------------------------------------------------------------------------|
| <b>Smoke alarms</b>                        |                                                                               |
| 2012/24AUSI                                | Photo smoke alarm 4-wire, 12/24V, AS3786:2014 A1                              |
| 2012J                                      | Photo smoke alarm 4-wire 12/24V w9V batt 12v with sounder, no battery back-up |
| <b>Conventional detectors</b>              |                                                                               |
| 2151BAUS                                   | Conventional Photo-optical detector 7%/m obscuration, uses B401AUS Base       |
| 5151AUS                                    | Conventional Thermal Detector 63deg Fixed temp, uses B401AUS Base             |
| 5151RAUS                                   | Conventional Thermal Detector 63deg ROR, uses B401AUS Base                    |
| 5151HAUS                                   | Conventional Thermal Detector 90deg Fixed temp, uses B401AUS Base             |
| 5151RHAUS                                  | Conventional Thermal Detector 90deg ROR, uses B401AUS Base                    |
| 885-WP                                     | Conventional Sealed Thermal, 60deg ROR, inc flying leads and mounting base    |
| B401AUS                                    | Conventional Detector Base to suit System Sensor 100 Series detectors         |
| D2-AUS                                     | Conventional Duct Detector 2-wire inc Detector (requires sampling tube)       |
| D4120                                      | Duct Detector 4-wire, 110vac/24vac/24vdc inc detector                         |
| D4120W                                     | Watertight Duct Detector 4-wire, 110vac/24vac/24vdc inc detector              |
| E60-AUS                                    | E-Type Heat Detector Probe set at 60degC                                      |
| E65-AUS                                    | E-Type Heat Detector Probe set at 65degC                                      |
| E70-AUS                                    | E-Type Heat Detector Probe set at 70degC                                      |
| E80-AUS                                    | E-Type Heat Detector Probe set at 80degC                                      |
| E90-AUS                                    | E-Type Heat Detector Probe set at 90degC                                      |
| E100-AUS                                   | E-Type Heat Detector Probe set at 100degC                                     |
| E110-AUS                                   | E-Type Heat Detector Probe set at 110degC                                     |
| E120-AUS                                   | E-Type Heat Detector Probe set at 120degC                                     |
| E150-AUS                                   | E-Type Heat Detector Probe set at 150degC                                     |
| E180-AUS                                   | E-Type Heat Detector Probe set at 180degC                                     |
| E200-AUS                                   | E-Type Heat Detector Probe set at 200degC                                     |
| E240-AUS                                   | E-Type Heat Detector Probe set at 240degC                                     |
| <b>Select Series Intelligent Detectors</b> |                                                                               |
| 2351BAUS                                   | Intelligent Photo-Optical Smoke Detector, System Sensor                       |
| 2351PTIRAUS                                | Intelligent Photo, Thermal and IR Multi-Criteria Detector, System Sensor      |
| 5351BAUS                                   | Intelligent Fixed Temperature Thermal detector, System Sensor                 |
| 5351RBAUS                                  | Intelligent Rate-of-Rise Thermal detector, System Sensor                      |
| 5351HAUS                                   | Intelligent High Temperature Fixed Thermal detector, System Sensor            |
| 7351AUS                                    | Intelligent High Sensitivity Detector, System Sensor                          |
| 2351BAUS-BL                                | SS CLIP PhotoSmoke Detector- Black requires B501AUS-BK base                   |
| 5351BAUS-BL                                | SS CLIP Thermal FixTemp Detector- Black requires B501AUS-BK base              |
| 5351RBAUS-BL                               | SS CLIP Thermal RoR Detector- Black requires B501AUS-BK base                  |
| <b>Detector Accessories</b>                |                                                                               |
| B501AUS-IV                                 | Addressable Detector Base - Ivory to suit addressable detectors               |
| B501AUS-W                                  | Addressable Detector Base - Pure White to suit addressable detectors          |
| B501AUS-BK                                 | Addressable Detector Base - Black to suit addressable detectors               |
| B501BI-W                                   | Isolator Base - Bright white to suit addressable detector                     |
| B501BI-IV                                  | Isolator Base - Ivory to suit addressable detector                            |
| B501BI-BL                                  | Isolator Base - Black to suit addressable detector                            |
