

WIP Phone

Warden Intercom Phone

General

Warden Intercom Phones (WIP) are designed for communication between the Floor Wardens and the Emergency Warning and Intercommunication System panel.

When taken from the cradle the WIP automatically rings the EWIS panel. When the EWIS panel calls the WIP phone, the call tone sounds from the speaker in the body.

When the handset is lifted, it automatically switches from the speaker in the body to the speaker in the handset and a communication link is made to the EWIS panel..

Features

- Separate speaker for call tone
- Simple two wire connection
- Includes wall mounting bracket
- Compatible with all I2000 systems

Agency Listings and Approvals

The listings and approvals below apply to the module specified in this document. In some cases, certain modules or applications may not be listed by certain approval agencies, or listing may be in process. Consult factory for latest listing status.

The Notifier WIP phone has been certified as complying with AS/ACIF S004.

It has been tested as a WIP phone for intercommunication system for emergency purposes to AS2220.1 at both the C.I.E. and the WIP locations if installed to AS 1670.4 .
